INTERIOR DESIGN | MANUFACTURE | SOLUTION

GET TO KNOW US

NARPAT AMRARAM Is The Managing Director And The Founder Of PINK LINE WOOD WORKS Founded In 1973, Is Well Reputed Firm Specialized In The Field Of Carpentry And Joinery Works In Dubai - UAE. Subsequently PINK LINE, An Established INTERIOR DESIGNING Company In Dubai To Provide Complete Turn Key Project Solutions. From Design To Execution, Today Our Companies Have Gained Recognition As Well As An Established Reputed In The UAE Providing Various Services To All The Spheres Of Interior Design.

Management Strength Of More Than 250 Employees, Dedicated To Serve The Best In This Industry, Having Based Ourselves On The Features Demanded By Large Companies, We Have Created Innovative, User-Friendly Applications That Are Now Available To Small And Medium-Sized Companies. PINK LINE Has A Labor Force Of 250 Persons, With Technical And Professional Staff, With Years Of Experience In Handling Large Projects For Prestigious Clients And Leading Consultants & Designers In The UAE A Number Of Overseas Projects Have Also Been Executed.

What we do...

CORPORATE OFFICES

CLUBS & HOTELS

BARS

BANKS

HEALTH CARE

RETAIL OUTLETS

RESIDENTIAL

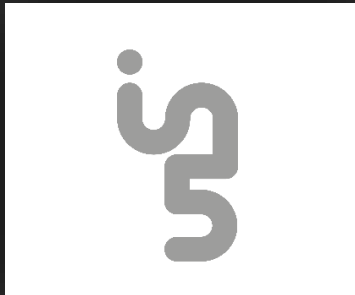

Our Clients

PROJECTS COMPLETED
BY PINKLINE WOOD WORKS

- Mashreq Bank
- Emirates Islamic Bank
- ADIB Bank
- RAK Bank
- Ajman Bank
- Rak Bank

- UAE EXCHANGE
- Bukhatir Properties
- Queen Elizabeth 2
- Bikanerwala

Our Clients

PROJECTS COMPLETED BY PINKLINE WOOD WORKS

- FANR
- Emaar
- Dubai World Trade Centre
- Majid Al Futtaim
- FILLI
- MEDICAL & FITNESS CENTER
- ASHOK LEYLAND
- JELLY BELLY ICE CREAM
- Same Day
- Lexus
- INSTECH
- Serco
- Patiala
- Famous Dave's
- Supper Club
- GQ Bar
- Burberry
- Musthafa & Almana
- Imperial Tobacco

Machines we used...

SCM Sliding Table Saw SI 350 Class

The SCM Si350 Class is a heavier saw than the Nova range.

The Si350 Class is an ideal choice for a good quality sliding table saw with no electronics.

The sliding table is an extruded aluminium profile with a honeycomb structure which offers maximum tensile strength and which runs on arc-ground steel slideways, giving accuracy to +/- 0.005mm along the entire carriage length.

Saw units on the SCM machines are a closed-type ring structure which are completely free of vibration, with cast iron supports for precise tilting of the sawing group, and round linear rods ensuring smooth vertical movements.

SCM Thickness S630 Nova

SCM exclusively use a heavily ribbed cast iron table for stability.

The table is easily set and adjusted with powered rise and fall coupled with digital readout of 0.1mm resolution.

The 300 mm capacity makes it especially suitable for constructional timbers and joinery.

Feed system Reliability and efficiency are combined. Either two or three motorized large diameter upper feed rollers, together with the rubber-coated outfeed rollers, guarantee efficient and constant feed with all type of wood.

The interchangeability of the upper feed rollers is included as standard equipment on the S630 NOVA model.

Table Mechanism 4 large diameter screws support the worktable.

They ensure high rigidity in all conditions.

This movement system allows to keep the table position steady without need to lock it.

Features: Digital Readout to thickness table,

Table running on 4 precision screws Automatic braking Large diameter 4 knife planer block

Paoloni P45

Heavy duty paoloni sliding table panel saw(p45)with cutting capacity 156mm

Squaring machine with tilting blade

Panel saw with tilting blade / reclining blade same saw

Format circular saw with adjustable saw blade /

Inclinable disc scanner

Formatting machine with tilt saw.

Orma NPC 3000/S

Hot presses NPC fabricated assembled steel platens or drilled solid steel platens Water boiler 90°C or boiler 120°C.

The press is complete with pump, boiler and pipes.

The presses of the NPC-DIGIT series are complete with automatic recuperator of the possible pressure loss(it works leaving current on.

Max. working pressure 260 At Standard emergency rope

MINIMAX CU300K

The top of the range 300mm universal machining centre for maximum strength and performance.

A cost effective machine for heavy duty work in the compact size of a smaller universal machine.

Wide squaring support with tubular steel structure, 4speed spindle moduler (with mechanical speed selection), fence with micrometric adjustment, planer with adjustable spindle and feed system with helical feed roller.

KUPER 900 VENEER STITCHING

Splicer with glue thread

Zig-zac splicing

Heater with hot air blow

Arm span 900mm

Pedal control

Hydraulic Hot Press ITALPRESSE XL/6-S

- Heating platens in welded steel
- Heating by means of thermal oil, hot water or electric elements (this one is oil)
- Electronic control panel.
- Digital timer for automatic opening with exclusion switch.
- Platen opening setting from the control panel.
- Digital setting and monitoring of working temperature.
- Digital setting and monitoring of working pressure.
- Weekly/daily timer to program the heating system switch-on (N.A with waste-wood heating system)
- electric exclusion of left pair of cylinders
- Selector switch to reduce power consumption on electric boilers above 18 Kw
- Two-hand safety control for press closing
- Safety rope on all four sides.

CENTAURO ALFA CNC MACHINING

A versatile and flexible CNC controlled machining centre suitable for a variety of machining operations including hinge recessing, lock slots, handle holes, key slots and euro grooves etc.

- Automatic vertical and horizontal machine
- Simple & quick pneumatic work piece clamps and positioning stops.

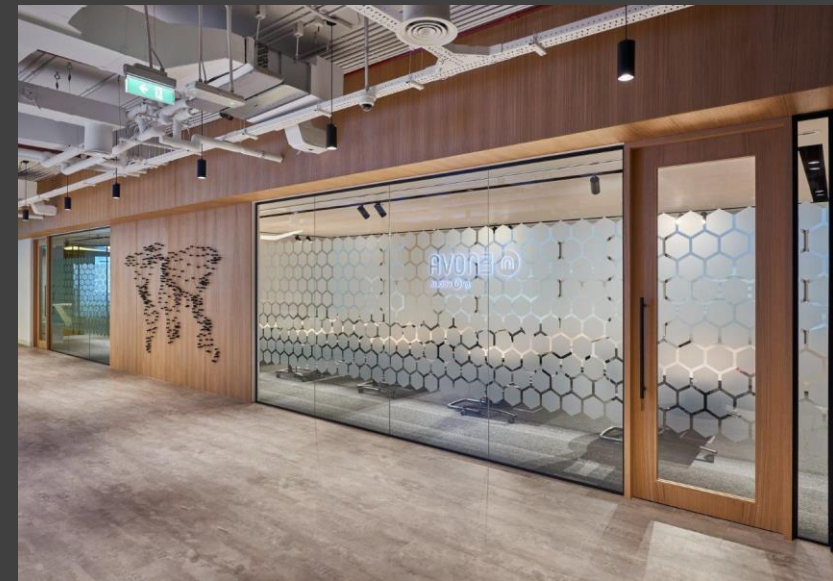

C45 COMPACT

- Scoring unit with separate motor with external adjustment
- Aluminium carriage sliding on high precision steel bar guides
- Anodized carriage and profiles
- Extensible fence on the cross-cut carriage with tilting reading
- Rip fence with micrometric adjustment
- Table extension
- CE: Parallelogram blade guard
- EXP: Blade Safety guard
- Automatic star-delta start
- Motorized blade lifting
- Manual blade tilt through front side handwheel with gravitational indicator
